A: If you want to go for the native Windows driver then the best route is to use onkyo-w45x-

fwdrv.sys, which you can download from here. Look for the.sys file. Download and install it. Reboot your system. Otherwise, all your options are to install the 3rd-party driver (NavCom.sys in this case) if you're running a 64-bit Windows operating system. Download the latest 64-bit version of NavCom.sys from here. Download the other DLL files that are required from here. Unzip the NavCom.sys file. Copy NavCom.sys to C:\windows\system32. Copy other DLL files to C:\windows\System32. In this case, the NavCom.dll file is a 32-bit library, so you might need to link it to a 64-bit library by running the following command: lodctr

C:\windows\system32\NavCom.dll Reboot the system.
